Revised 08/16/2021

Product	Description
Producer Database	Repository of producer information from state insurance departments updated daily with licensee demographics, license history, appointments/terminations, and regulatory actions.
Appointments/Terminations via NIPR Gateway*	Reciprocal, standardized, automated process designed to improve the effectiveness and efficiency of the licensing process between state regulators and insurance carriers. Programming required to submit appointments/terminations directly through the Gateway.
Interactive Appointment/Termination <i>Insurance Carriers Only</i>	Application designed for insurance carriers to submit appointments and terminations through NIPR's front-end application.
Company Appointment Report (CAR) <i>Insurance Carriers Only</i>	Report accessed by an appointing insurance carrier that includes active Appointments, Terminations or Appointment/Termination History for a specific company in a particular state.
Company Specialized Report (CSR)	Report that allows requestor to select up to 4 of 12 fields of data contained in the PDB. Individual entities are supplied by the requestor and the designated fields are populated by data from PDB.
Alerts* (programming required for discounted rate)	This product is designed to provide notification to users indicating a change has been made to data stored in the PDB.
Licensing (Non-Resident or Resident; Initial or Renewal)	Application allows individual and business entities to apply for and renew licensing credentials in a uniform streamlined manner.
